**Subject:** Army Creek Landfill : Western Lobe Study January 2020 Monthly Report  
**Attachments:** ATT00001.txt; ACPS January 2020 Monthly Progress Report.pdf

Debra,

On behalf of Army Creek Private Settlers and New Castle County, EHS Support is submitting the Army Creek Landfill Western Lobe Study January 2020 Monthly Progress Report for your review. Once you have reviewed, if you have any questions or comments please do not hesitate to contact either me or Susanna Mays.

As noted in the attached Monthly Report, we have not obtained the Environmental Right of Entry from Norfolk and Southern for sampling access to wells MW 54, 56 and 58. As a result, we are requesting the following:

1. The mid January 2020 sampling event be postponed, a second time, to the week of March 23, 2020. We have been in contact with Norfolk and Southern. As of yesterday, they have advised the application is being reviewed by their Environmental Department. We will continue to update you on this issue.
2. Since these wells have not been sampled for PFAS components, we cannot adequately evaluate the groundwater data from the study area. As a result, ACPS is requesting that the March 2020 PFAS Report submittal date be extended until the end of June 2020.

If you have any questions, please do not hesitate to contact me.

Regards,

Marty

Martin L. Schmidt
